i would not reccomond this! everytime i try to "play" im like 5 feet to the side of the actual track so i keeop going through walls. you dont feel the force of the vr so it makes you feel dizzy. Terrible. Start the game and there are 2 boxes. Look at the left to start Rift Coaster HD and look to the Right to Start Rift Coaster Vr. If you look at the VR its just a movie screen like player, that shows you a video of cool looking tracks in multiple enviroments. It plays for about 30 seconds and then takes you back to the main menu. You look at the HD box, and it actually loads up the simulation, its the only " game " I have played so far that has stuttering, and its only 1 track.. 89 cents and overpriced. The only highlight is the dragon. Spend a dollar for a essentially a video and a trailer with settings to adjust rendering quality that make hardly a difference adjusted.. Its \$0.99 so just buy it and ride a roller coaster. what else can I say. The sound doesn't work so go pipe in some Olivia Newton John or whatever blows yourup. The old lady rode it and she fell out of the car and broke her - just kidding.. 2 short buy I guess for the price it's ok.. This is good.. UPDATED REVIEW, see original review below I changed my review to recommend. There's a few reasons for

---

this. 1) Price - .99 cents is the right price for the content (very short ride) 2) Improvements - game runs much smoother now, still stuttered a bit on high, but on low and medium settings ran very well, dragon's fire breathing looks pretty cool now 3) Responsive dev - fixed the description, updated game, etc., This is one of the best looking VR roller coaster games out there, but it's just extremely short. Still a must buy for roller coaster fans. ---- The reason I do NOT recommend this game is because this developer is lying on the store page. "Crazy tracks", plural. This implies there is more than one track to experience. There is not. There is only one track. One track which you can experience in High, Medium, or Low Settings. It's still one track. And I couldn't tell the difference between high, medium, or low settings (past the home page where you can see the effects on the shadows) other than the frame rates really stuttered on high (I have Oculus Rift with GTX 1060 and i7, 16 gb ram) The track is nice, but it's way too short. There's free demos that last longer. IF the dev was just honest, I could recommend this game because it delivers a nice setting for a roller coaster VR ride even if it's too short.. How can they charge for this?, it lasts less then that free desert vr coaster game, no matter what settings you use it has stuttering. If they fix the stuttering make it last longer or add 1 or 2 more tracks id change my review but for now this isnt worth anything.
